Executive Director – Protective Services and Parking Operations
RE: New Staff Parking Rates – January 4, 2010

Alberta Health Services (AHS) Parking Services recently completed an extensive market analysis of parking rates across Canada, matching and comparing Alberta communities with other communities of similar size, parking demand, and parking market conditions. In accordance with AHS policy, all costs associated with parking, including funding for future parking needs, must be fully recovered by parking revenue.

As a result of this analysis, new staff parking rates have been approved to take effect January 4, 2010. Parking rate information for each site is contained in a separate document attached to this memo.

At this time, the new rates will be in effect at AHS sites that currently charge staff for parking with one addition -- the Queen Elizabeth II Hospital in Grande Prairie. As the transition to a provincial parking administration continues, Parking Services will continue to review parking at all facilities. To ensure that rates continue to be fair and equitable, AHS policy requires that an annual review of parking rates be conducted in conjunction with an updated market analysis.

As part of the provincial consolidation of AHS on April 1, 2009, Parking Services was unified under a single provincial administration in the Protective Services portfolio. The Parking Services team will be working diligently over the next year to achieve efficiencies, develop standards, and create a province-wide parking service that is consistent, fair and equitable to patients, public and staff.

Please give this memo wide distribution and post in staff areas. Thank you for your assistance and understanding. Questions or comments can be directed to provincialparking@albertahealthservices.ca.
