

Resident Transfers

Are you considering transferring into another program? Things to consider:

- Be sure to review the transfer policy! The transfer policy is available through the PGME office.
- Current pay levels will not be reduced per Article 23.
- Transferring from FM to RC programs Residents will always be appointed to the lowest training level until the PGME office receives an assessment of training from the Royal College. Residents are responsible for acquiring the assessment and providing a copy to the PGME office.
- Residents transferring from RC to FM programs are required to complete six months in FM before credit for previous training will be determined.
- It is important to understand the implication to pay levels when requesting transfer; residents may be red circled for the duration of their training - transferring from RC to FM, a resident will be held at their current pay level for the duration of their training if their current pay level is >PGY2.
