

# RESIDENT PHYSICIAN OF THE MONTH

MARCH

## A colleague shared this about Dr. Hill:

"Dr. Hill was Chief resident physician of the Radiation Oncology program at the University of Alberta, when I transferred from Winnipeg. As a father of a family of five, I was very stressed out about finding a place to live in Edmonton. The place we ended up buying wasn't available until one month after we arrived in Edmonton. Dr. Hill was away with his family on elective, so he let my family stay at his place, free of charge, while we waited for our new house to be available. I cannot adequately describe how kind this gesture was, knowing that my family would have a place to stay and that this was the welcoming culture of the new program that I would be joining. Dr. Hill also meets with junior resident physicians on a regular basis to provide teaching and has even compiled a comprehensive set of notes that covers the Royal College Objectives, which he shares freely to all resident physicians. I know that he will be an awesome leader in the field of medicine and believe he should be a recipient of the Resident Physician of the Month Award!"

## Dr. Jordan Hill Radiation Oncology University of Alberta

I'm originally from Medicine Hat. I did my undergraduate studies in Exercise Science at BYU (Brigham Young University) in Salt Lake City, Utah. I completed my M.D. at the University of Alberta in 2018 and am now in the final year of my radiation oncology residency (PGY 5). Following my residency, I plan on doing a fellowship at Harvard University's Dana Farber Cancer Institute, where I will sub-specialize in adult and pediatric CNS tumours. I have several hobbies including golf, running and basketball. Mostly, I keep busy with my family (wife and three kids ages 7, 5, and 3).
