

# RESIDENT PHYSICIAN of the MONTH

May

## A colleague had this to say about Dr. Greer:

Dr. Greer is originally from Saskatoon and is currently a 4th year psychiatry resident at the University of Alberta. She has been a supportive, kind and empathetic friend and co-resident for the last several years.

Not only is she a wonderful colleague and friend on a personal level, she makes continued efforts to promote unity and cohesion in our program at large.

She is also an active member of our program's advocacy group. She most recently delivered upwards of 5 bags of clothing donations to the Alberta Hospital Edmonton apparel shop!

Her co-residents consider themselves lucky to have such a wonderful person in their life, to walk this journey alongside them.

## Dr. Justine Greer PGY-4 Psychiatry University of Alberta

I was born and raised in Saskatoon, SK where I also completed my undergraduate and medical training, with my clerkship years spent at the Regina site. I made the move to Edmonton for residency in 2018 and I am currently a PGY4 in the psychiatry program.

I was drawn to psychiatry for the opportunities it offers to connect with people, hear their stories and try to understand why they came to be the way they are. I also like connecting with my co-residents and teaching junior learners.

Outside of medicine, I enjoy spending time with my husband and my two cats, going to restaurants, running outdoors in all seasons and working on crochet projects.
