

RESIDENT PHYSICIAN Of the MONTH

December

A colleague had this to say about Dr. Jennifer Mann :

Dr. Mann has been exemplifying what we value in physicianship: high performance during a stressful pandemic, utmost dedication to patients assigned to her care, compassion in times of duress and kindness as support for her peers.

She is a leader, a partner in care and above all a great human being. We value you and all your efforts in the past months.

Dr. Jennifer Mann
Neurosurgery
University of Calgary

I'm from Saskatoon, SK and I attended medical school at the University of Saskatchewan. I was so fortunate to join the Calgary Neurosurgery program two and a half years ago where we perform world-class surgery, patient care, and research every day. I'm lucky to be mentored by amazing staff and train with an exceptionally talented group of resident physicians and even more lucky to consider them my closest friends.

Outside of the hospital, I attempt to stay active mainly by running along the Bow River. I enjoy golfing, hiking, snowboarding with my boyfriend, and spending time with my co-resident physicians over food and drinks.
