

RESIDENT PHYSICIANS OF THE MONTH

MAY

Dr. Arjun Ghuman

Physical Medicine & Rehabilitation University of Alberta

I am a PGY5 resident physician in Physical Medicine & Rehabilitation in Edmonton where I also completed medical school. I am also very fortunate to have been born in Oil Country (Let's Go Oilers!) where I have completed my entire education, and I am moving to Toronto this July to complete a fellowship in Cancer Rehabilitation and pursue a Masters.

I am a big Oilers fan and I feel we have a great chance at bringing the cup back to Canada this year. Outside of hockey, I enjoy traveling with my wife - we are ~~to~~ have been able to visit East Africa and Costa Rica in the past eight months. I also love playing golf and finding time to chill with my co-resident physicians - a really friendly, outgoing, and awesome group!

Dr. Brandon Lieu

Physical Medicine & Rehabilitation University of Alberta

Born and raised in Edmonton, Alberta, I haven't had to travel very far for my academic pursuits. I have been at the University of Alberta for the past 13 years of my post secondary education. I have always enjoyed living an active lifestyle and judo has been my main sport from the age of nine until now! It was actually through the inspiration of

my judo instructor, a physician who would volunteer his time at the medical tent during judo tournaments, that I decided to pursue medicine.

Physical medicine and rehabilitation was a natural fit for me, and I am so fortunate to have the support of my family, friends, preceptors, and fellow resident physicians in the program. I will be heading to Stanford for a spinal cord injury medicine fellowship after graduating in hopes of bringing even more back to our amazing community of rehabilitation care we have here. Apart from medicine and sports, I am blessed to have recently married my lovely wife and am excited to start this new chapter in our lives, together.

A colleague shared this about Dr. Brandon Lieu & Dr. Arjun Ghuman

I nominate Drs. Brandon Lieu and Arjun Ghuman due to their contribution to the resident physicians of the PM&R program. As a former student, I appreciated their help, support and teachings that helped me decide my path towards PM&R. Aside from contributions as teachers to students and peers, they were also active as chief resident physicians, organizing social and academic events throughout the year, thereby contributing to a collegial and supportive culture within the program.
