

RESIDENT PHYSICIAN OF THE MONTH

August

Dr. Connie Le Radiation Oncology University of Alberta

I am an Edmontonian to my core and will happily rave about the city. I get to be a part of the best program in the best specialty, Radiation Oncology. My post secondary training has been based at the University of Alberta and I enjoy using education as an excuse to explore the world. I love spending time with friends and family, biking to get treats, and altering thrift store finds.

A colleague had this to say about Dr. Le

Connie is a current PGY-1 in our program and while she's early on, she is already making a phenomenal impact in the culture of our program, as well as the culture of residency training in Alberta as a whole!

Academically, she's a huge asset to our program as she provides one-on-one teaching to medical students rotating through our program. Additionally, she has helped prepare many co-resident physicians (like myself) for writing the USMLEs.

From an extra-curricular stand point, she does even more! She's an active member of the PARA general assembly who sits on several wellness committees and in addition to planning several city and province wide wellness events, she has also presented at and attended international conferences on resident physician wellness and shared her work and the work of others at numerous city-wide and provincial meetings.
